

# Building the Future in MetaRang

Premier Solutions for  
Metaverse Architecture  
& Exhibition Spaces

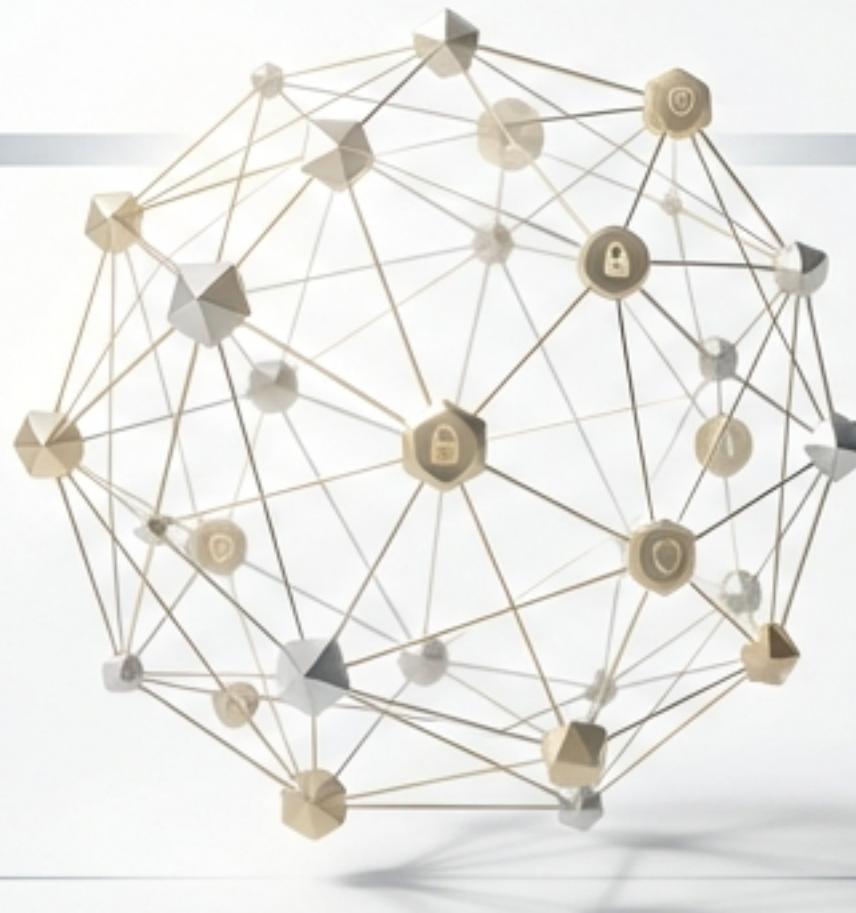

MetaRang Global Construction & Design Division

MetaRang

# A Sovereign Global Parallel World

---

## The Vision

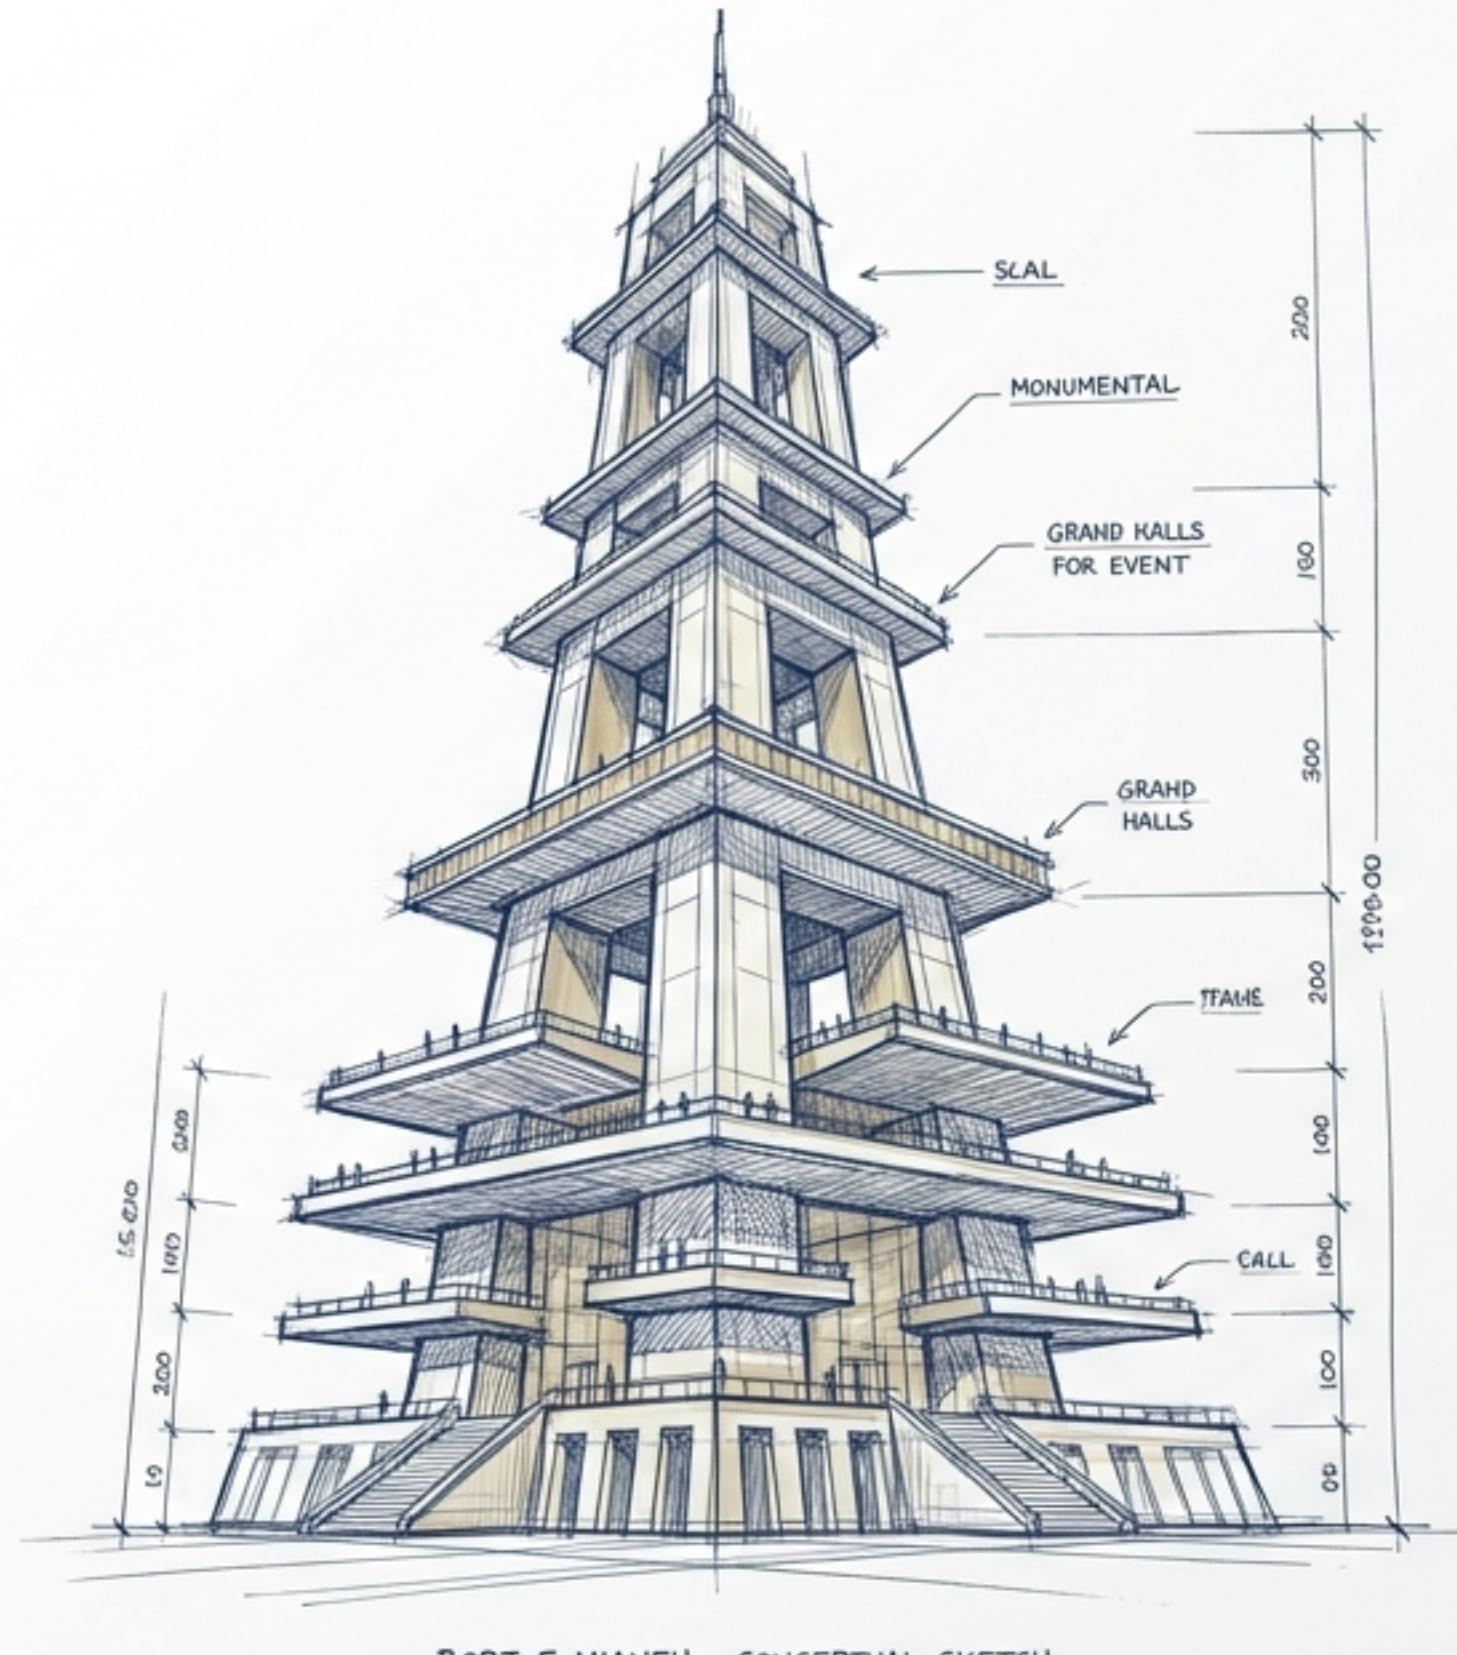

MetaRang is defined by the Sovereign Global Decentralization Charter. It is a purely global, decentralized parallel world, independent of political intermediaries.

## The Economy

We are building a civilization driven by code and community. This is a hub for the global economy, entrepreneurship, and international B2B interaction.

## The Opportunity

Within this parallel life, businesses require a physical presence to anchor their brand identity and facilitate trade.

# The Hub of Activity: The Middle Tower

**The Venue:** At the heart of our commercial district stands '**The Middle Tower**' (Borj-e Mianeh), a monumental vertical city.

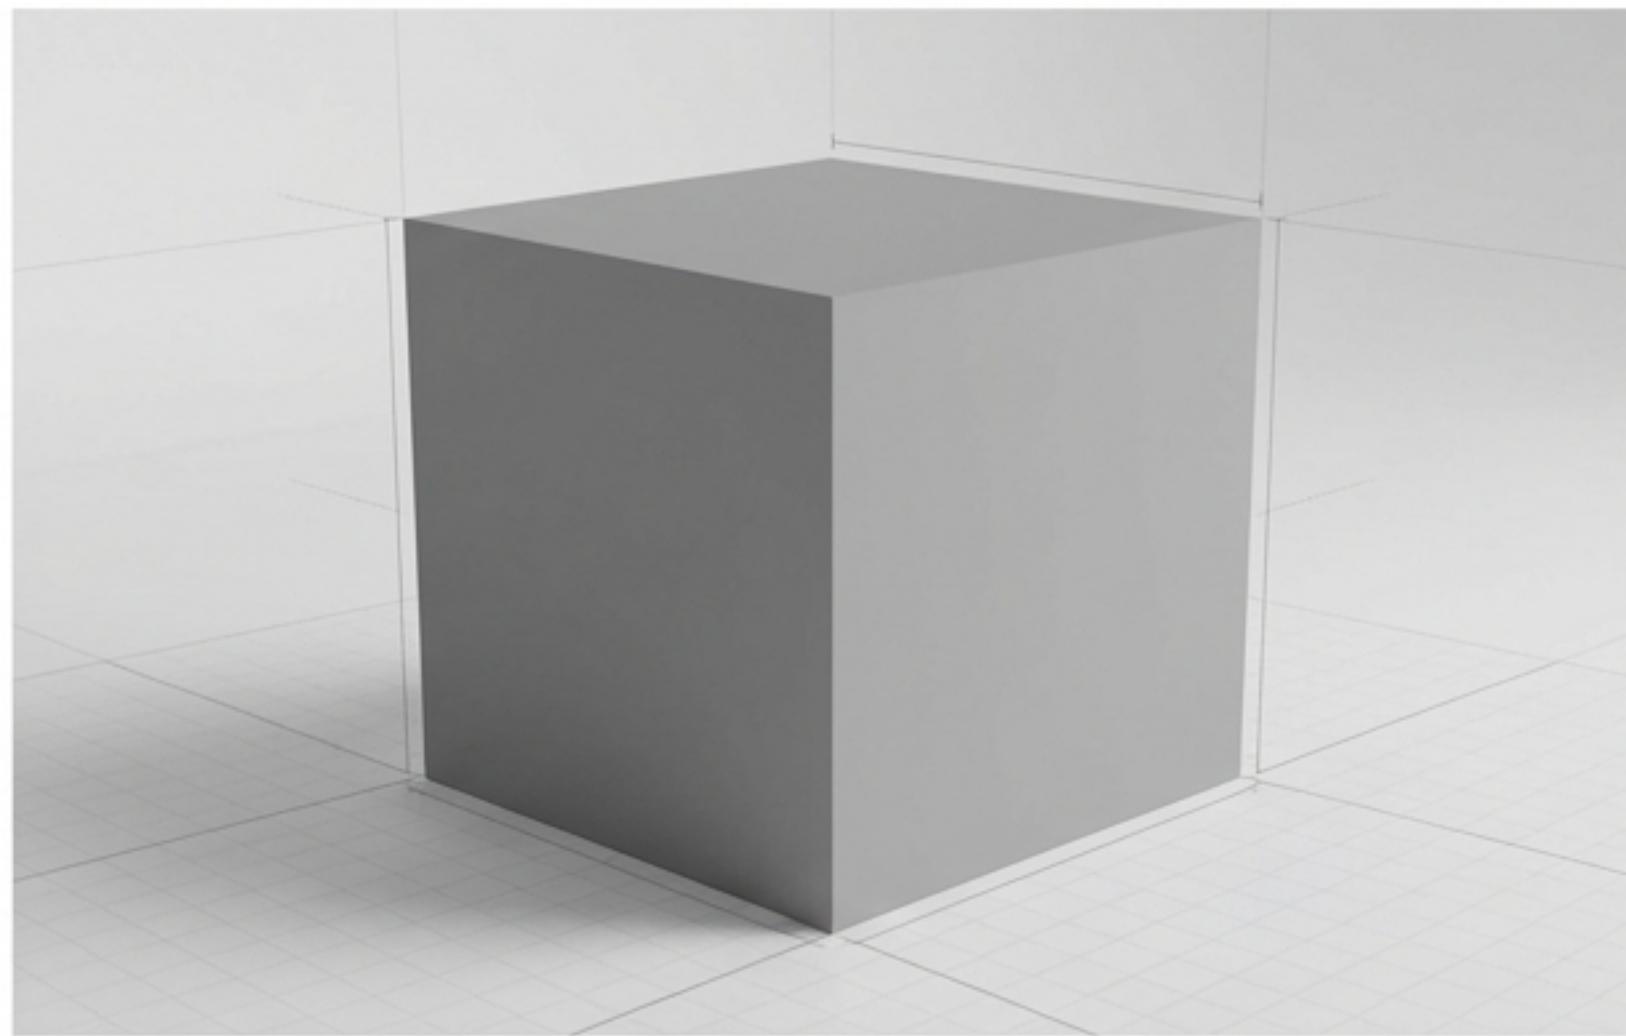

**Purpose:** Designed specifically for grand exhibitions, international seminars, conferences, and large-scale celebrations.

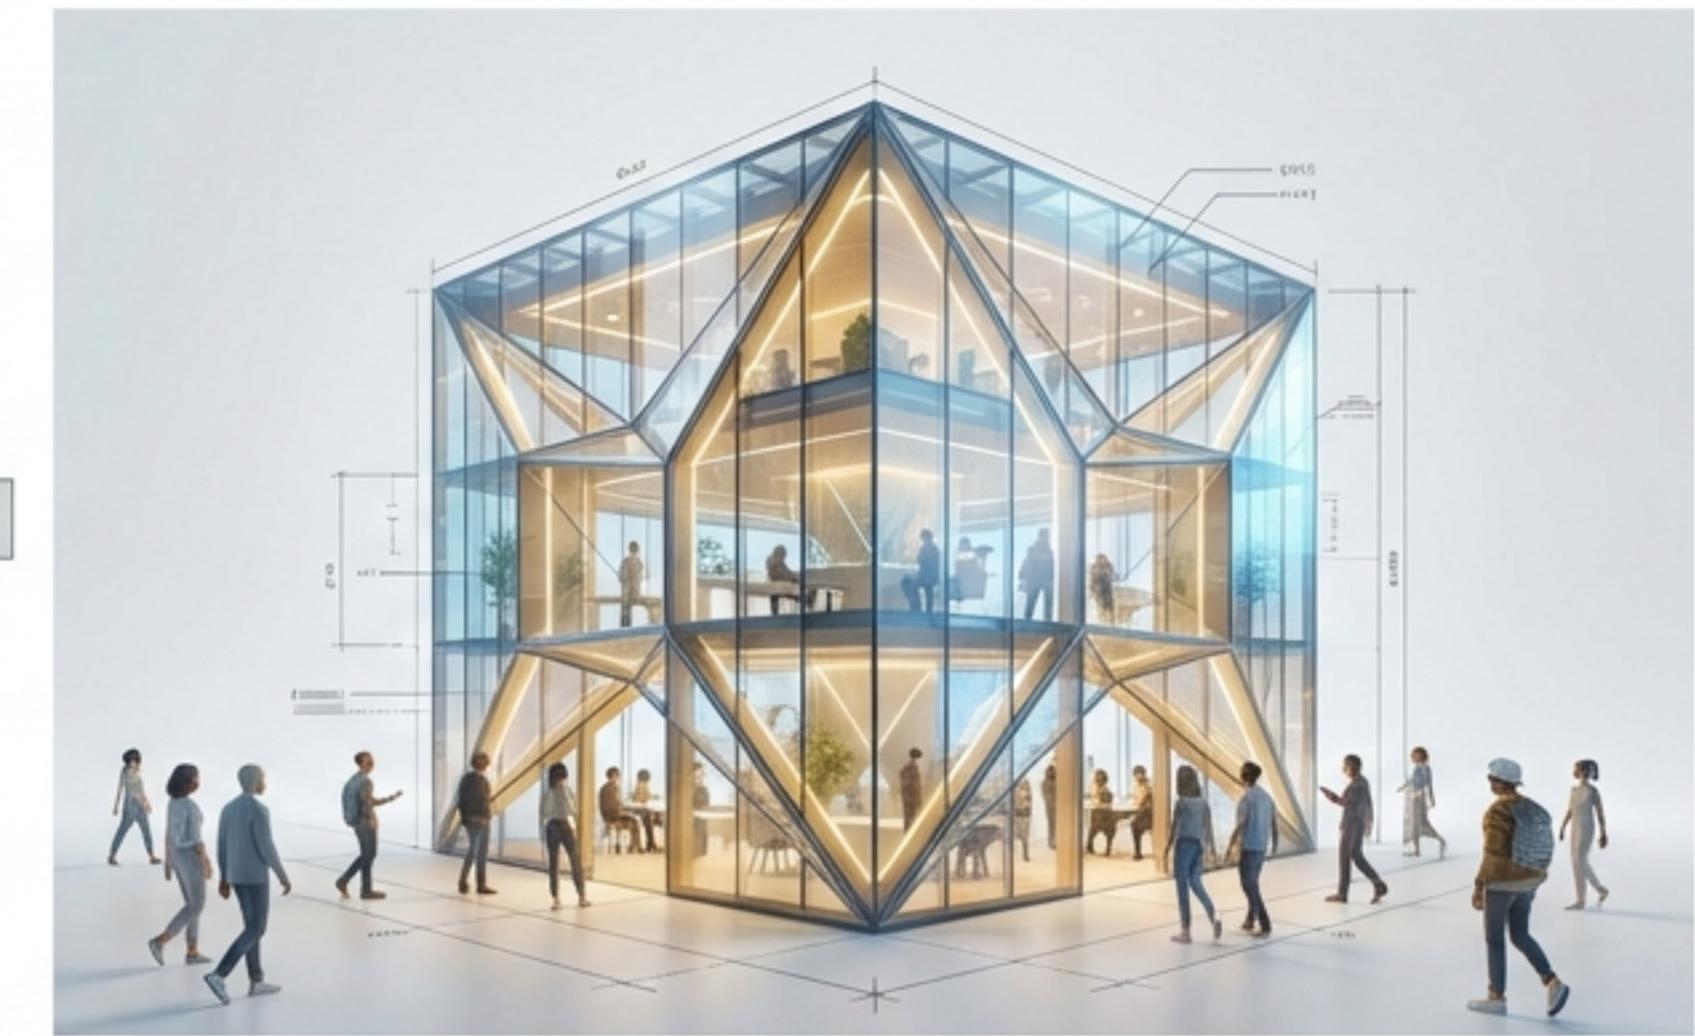

**Scale:** Immense verticality allows for multi-tiered events simultaneously. The sheer scale conveys the prestige of the brands residing within.

# Define Your Presence

**Standard Template**

**Custom Commercial VOD**

In MetaRang, your structure is your brand. Users can purchase Commercial VODs (Virtual Object Designs) and customize them to introduce their trade to global markets. Customized structures allow you to interact seamlessly with non-native applicants and international clients. Building a high-fidelity, optimized, and awe-inspiring presence requires specialized architectural engineering.

# The Builder's Gateway

To facilitate world-class architectural development, MetaRang has established a dedicated communication channel for enterprises and creators. This is a streamlined path connecting you directly with our specialized architectural and engineering teams.

## Service Scope:

For the design, construction, and execution of metaverse booths and structures.

Engineering & Structural Analysis

# Phase 1: Design

- **Concept to Reality:** Our design process begins with your brand identity. We create custom models that defy physical limitations while maintaining structural logic.
- **Bespoke Architecture:** Whether you need a sleek corporate showroom or an avant-garde art gallery, our design team translates your vision into the language of the Metaverse.
- **Scope:** Full exterior and interior spatial planning.

# Phase 2: Construction

- **Technical Excellence:** Converting high-concept designs into optimized 3D assets ready for deployment.
- **Optimization:** Ensuring high-fidelity visuals that perform smoothly across devices without lag.
- **Standards:** Rigorous adherence to platform standards to ensure your booth integrates perfectly within The Middle Tower or your private land parcel.

# Phase 3: Execution

- **Live Operations:** The structure is just the beginning. We assist in the execution of your metaverse strategy.
- **Event Hosting:** Capabilities for hosting seminars, product launches, and B2B networking events within your structure.
- **Functionality:** Integration of multimedia presentations, voice chat zones, and interactive brand elements.

# Why Choose Professional Execution?

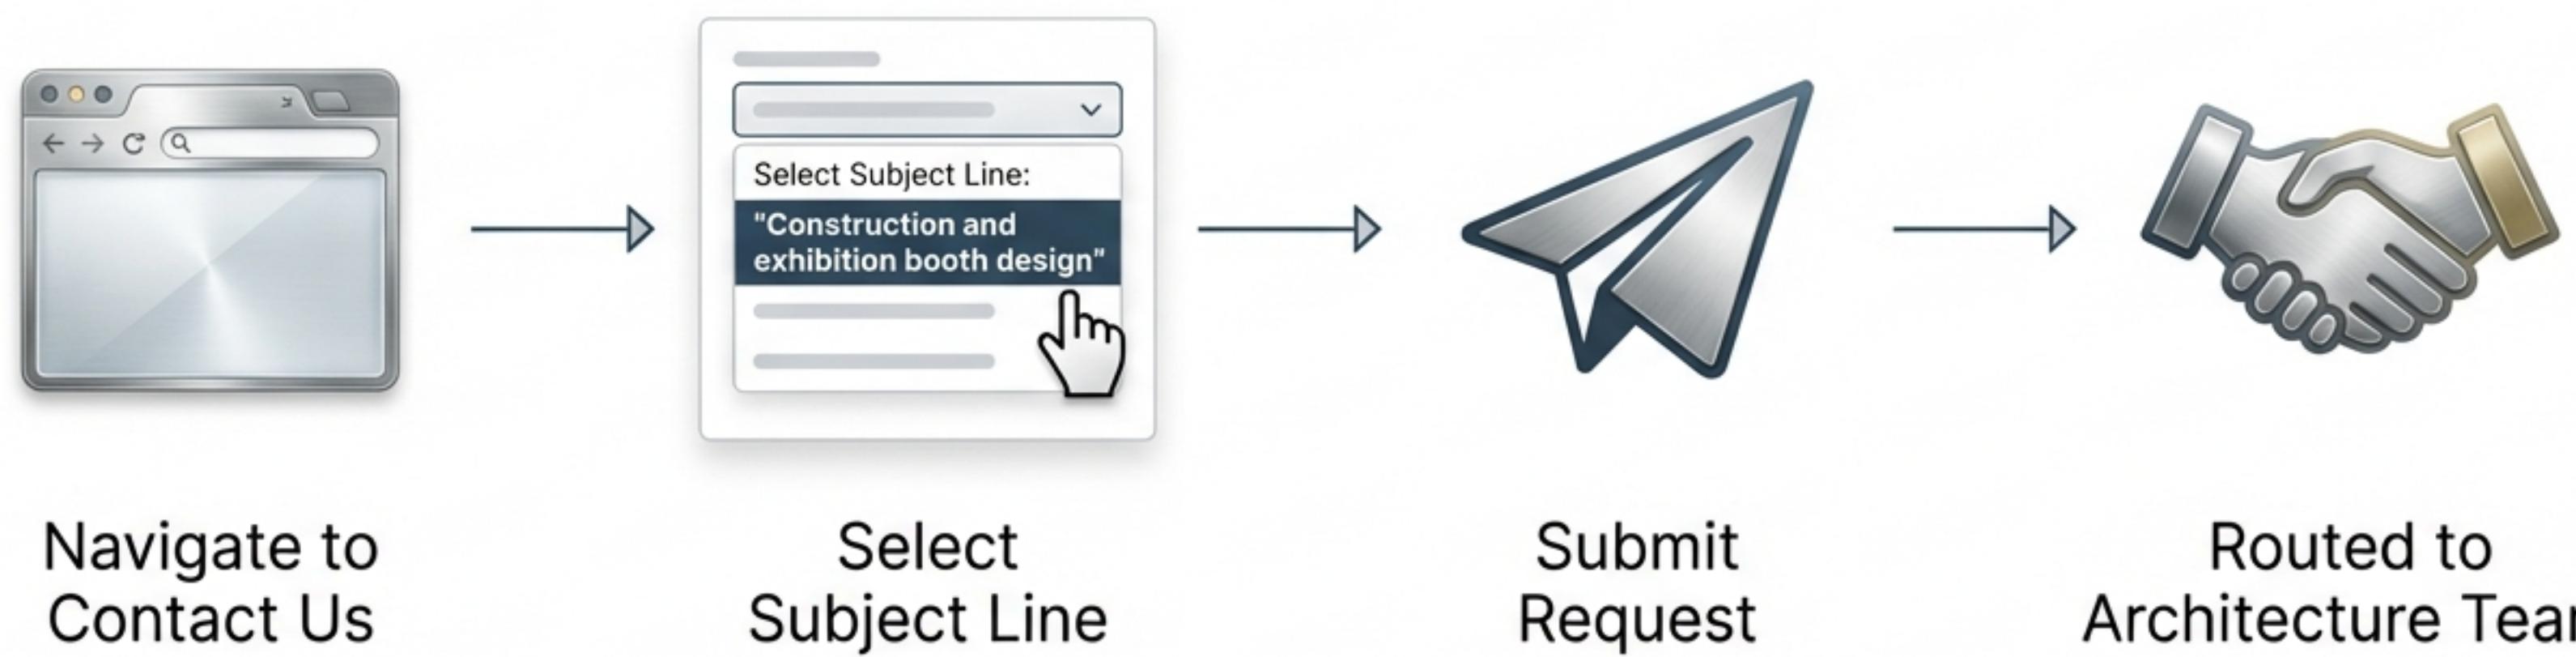

## Standard Entry

- Default Avatars & Structures
- Limited Brand Expression
- Standard Physics

## Professional Execution

- **Customization:** 3D models with exact dimensions and shapes specific to your trade.
- **Brand Authority:** Stand out in the Middle Tower with architecture that signals market leadership.
- **Direct Support:** Access to specialized designers for executing complex environments.

# How to Connect

Submit your request today. This priority channel routes your inquiry directly to the Architecture & Development Team.

# Build Your Legacy in MetaRang.

The Metaverse is not just about presence; it is about impact.
